GitHub — LinkedIn — harshjanghel875@gmail.com — +91-9153412808
Jamshedpur, Jharkhand — 831011, India

Summary

Computer Science undergraduate with a foundation in cybersecurity and full-stack development. Skilled in problem-solving and building responsive applications, eager to contribute to impactful projects.

Education

Bachelor of Technology in Computer Science and Engineering (Cyber Security & IoT) 2023 – 2027
C.V. Raman Global University, Bhubaneswar CGPA: 8.77 / 10.0

Experience

Summer Intern — TATA STEEL May 2025 – June 2025

Tata Steel, Jamshedpur, Jharkhand, India

- Developed an IoT-based industrial safety monitoring system to track environmental and operational parameters in real time.
- Integrated sensor data with a cloud-based dashboard for visualization and monitoring.
- Assisted in collecting, analyzing, and presenting real-time data to support safer and more efficient plant operations.

Projects

Research Paper Simplifier

Python, Streamlit, NLP (Transformers), PyMuPDF

(Project Github Link: <https://github.com/875-harsh/research-paper-simplifier.git>)

- Developed a web app to simplify complex research papers into easy-to-understand summaries.
- Integrated NLP models using Hugging Face Transformers for text summarization.
- Extracted and processed PDF content using PyMuPDF for efficient analysis.
- Generated structured summaries and keyword insights to enhance readability.

ThreatLens – AI-Based Login Threat Detection System

React, JavaScript, Spring Boot, Spring Security, Maven, MySQL

(Project Github Link: <https://github.com/875-harsh/ThreatLens.git>)

- Built a security-focused system to monitor login activity and detect suspicious behavior.
- Implemented a risk-based scoring mechanism to classify login attempts as safe or suspicious.
- Visualized login insights through an interactive dashboard with real-time updates.
- Implemented secure authentication using JWT and bcrypt.

IoT-Based Industrial Safety Monitoring System

ESP32, IoT, Sensors, ThingSpeak

- Developed an industrial safety monitoring system using ESP32 to track environmental parameters.
- Integrated sensors to collect real-time data on temperature, gas levels, and humidity.
- Transmitted sensor data to ThingSpeak IoT platform for live monitoring and visualization.

Technical Skills

Languages: Java, Python, JavaScript

Web Technologies: HTML, CSS, React

Backend: Java, Spring Boot, Maven, MySQL

Databases: MySQL

Tools: Git, GitHub

Concepts: Data Structures & Algorithms, OOP

Achievements & Certifications

- Completed Go for Gold Contest – iAspire (Accenture)
- Cisco “Introduction to IoT” course Certificate
- Google Cloud Arcade Legend (Jan–June 2025)
- Prashikshan 2025 – Tata Steel: Certified in *Automation & Industrial IoT* (May–June 2025).
- Received Amazon Q Dev CLI swag
- Innovation by Design — NPTEL
- Top 5 , Kon Banega Codepati (Coding Ninjas 10X Club)
- IBM SQL and Relational Databases 101 (Cognitive Class) Certificate
